

HELICOPTER BELLY FOAM ATTACHMENT

PART NO: HBF

DESCRIPTION

The Helicopter Belly Foam Attachment is designed to roll under the helicopter and foam the underside of the airframe. It can be attached onto any foam unit to quickly change a standard foam unit into a belly foam attachment. Includes stainless steel disconnects for easy transport and storage.

FEATURES

- Eliminates the need for high pressure cleaning
- Reduces the amount of labor needed to clean the aircraft
- Can be used on multiple airframes
- Provides maximum contact time for chemical effectiveness
- Offers savings in chemical and water usage
